

Please Do NOT allow cell phone to be used in-flight.

As a career Flight Attendant for American Airlines (14 years so far) I AM CONCERNED FOR THE SAFETY OF MYSELF, MY FELLOW CREWMEMBERS AND THE PASSENGERS because the use of cell phones in-flight could certainly allow TERRORIST to communicate with each other from the ground or even from aircraft to aircraft.

I have experienced the difference over the years as cell phones have become standard for every passenger. Besides the annoyance of having to endure a multitude of loud conversations that should be held in private (Whatever happened to the old phone booths?), allowing in-flight cell phone use will also increase "air-rage" among passengers who get fed up with their seat mate's incessant chatter. In-flight fighting will create a safety issue for the flight attendants, and ultimately the safety of everyone on board.
